

Package - Id 19

WEEE Forum package	Created by: WeeeSys 09-01-2019, Date of background lists: 09-01-2019		
Package name	compressors - WF - 'model 2'	Calc. model	WEEE Dir. 2012/19/EU, WFD 2008/98/EC
May be used by	all	WEEE-system	DEMO system
Output fraction	16 02 16 / 12 - compressors (excl. oil)		
Internal name and code of output fraction	compressors from C&F - case dismantling - 'model 2'	Remarks	case dismantling, worst case for residues, done with calculation model 2

All fractions, acceptors/technologies and composition-data

unknown (???)	dismantling / sorting	I	100,0000 %
* 16 02 16 / 02	iron-metals 'pure' from dismantling		90,0000 %
unknown (???)	steel mill 'traditional'	F	100,0000 %
Fe / stainless steel	Fe > Fe recovery	R	R
			100,0000 %
* 16 02 16 / 06	copper-metals 'pure' from dismantling		8,0000 %
unknown (???)	Cu smelter 'traditional'	F	100,0000 %
Cu	Cu > Cu recovery	R	R
			100,0000 %
* 16 02 16 / 90	residual waste from dismantling - no hazardous substances and plastics below ROHS/REACH values		2,0000 %
unknown (???)	landfill	F	100,0000 %
mixed fractions - disposal	no use - 'cold technologies'	LD	LD
			100,0000 %
