

Main news WF-RepTool Jan. 2015

summary by Renate Gabriel & Willi Haghofer

*please see also
'user manual – reporter level Jan2015' and
'user manual – system level Jan2015'*

Main news - 'general'

- ✓ **Graphical presentation** of WF-RepTool reports – with the '**Graph**' – version of WF-RepTool reports (see report menu point for the report) you may have a **quick look** on reports (see e.g. option to collapse/expand 'branches' of the treatment tree), you may **jump** directly to the OUTPUT fraction or the treatment step in the 'Overview' and the 'Treatment of' – page and go on working with e.g. new data. **Mistakes** or **missing data** detected by the 'Inspect' – function are shown with **red shades**, which allows you to focus on and work up open points.
- ✓ Option to **upload attachments** – this new feature allows you to upload attachments to the **WF-RepTool report** itself (i.e. the first treatment step company, e.g. any plant approval, the 100/1000-unit test for cooling and freezing appliances) or for **next step treatment acceptors/technologies** and/or **OUTPUT fractions** (e.g. any analysis of fractions, treatment results).
